DRIED FIGS

Turkey is the leading figs producer. The best dried figs are produced in Aegean region. When the fresh figs are not collected after maturing, they lose their natural water on the tree during the months of August and September and they fall off naturally. Then, figs are gathered and naturally dried under the sun.

PACKING

200 gr

RAISINS

Sultana Raisins

World sultana raisins production differs from year to year due to weather conditions. The average production is between 665,000 and 800,000 metric tons. Turkey ranked as the second biggest producer of sultana raisins with 30% of the 755,900 metric tons of total world production.

FREEZE DRIED FRUITS

Freeze-dried fruits are lightweight, nutritious and delicious. They are 100% pure and retain many of the natural nutritional, flavour and colour characteristics from their fresh form. We offer a range of fruits and cut sizes to suit your application and offer contract drying services also.

Our range of Organic Freeze-Dried Fruit is ready to consumed, but can also be added as an ingredient to your products to create an unique flavour and optimal Shelf-Life.
